

- Advertising the mappings at LSR2 and LSR4

LSR1 routing table
R1 via LSR2

LSR1 label table

LSR1 FEC table

R1 → 1, PUSH(L4)

Received mappings

R1:L4 via 1 (used)

LSR3 routing table
R1 via LSR1

LSR2 routing table
R1 direct

LSR2 label table
(2, L3) → 1, POP
(0, L4) → 1, POP

Note: use of per-interface or per-platform label spaces is up to LSR (here per-interface is assumed)

LSR4 routing table
R1 direct

LSR4 label table

Received mappings

R1:L3 via 1 (unused)

LSR4 does not use mapping R1:L3 because not along IP shortest-path
